DETAILED ACTION

1. The Amendment filed by Applicant on 08/12/05 has been entered.

Response to Amendment/Arguments

2. Applicant's amendment and arguments filed on 08/12/05 have been fully considered and they are found persuasive.

3. The rejection of claims 1-19 under 35 U.S.C. 102(a) as being anticipated by Keoshkerian et al., U.S. Patent No. 6,469,094 is withdrawn.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

5. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1713

6. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-19 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-19 of U.S. Patent No. 6,767,974. Although the conflicting claims are not identical, they are not patentably distinct from each other because it appears that the present claims are a subset of the claims in U.S. Patent No. 6,767,974. In others words, if one practices the present invention, infringement occurs of U.S. Patent No. 6,767,974.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

9. The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do

Art Unit: 1713

not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

10. Claims 1-19 are rejected under 35 U.S.C. 102(a) as being anticipated by Nzudie et al., U.S. Patent No. 6,774,176 (hereinafter "Nzudie"). Nzudie teaches a process for the preparation of fluorinated polymers by miniemulsion polymerization. In example 1, Nzudie teaches a process for preparing a miniemulsion from two mixtures and flowing the miniemulsion with a polymerization reactor and heating the miniemulsion to prepare polymer particles.
